

ayurIn CAPSULES

The effective natural and safe solution to Urinary Calculi

Lithotriptic action – Breaks and Dissolves renal stones:

Ingredients of Ayurin like *Bergenia ligulata* extract, *Crataeva nurvala* extract, *Dolichos biflorus* possess Lithotriptic activity i.e. the potential to break and dissolve stones. Thus, helps to expel renal stones and remove obstruction.

Diuretic action: Combined with Lithotriptic activity, diuretic activity helps to flush out the calculi via urine. *Tribulus terrestris* extract, *Vetiveria zizanioides* possess excellent diuretic activity.

Prevent reformation of urinary stones: Ingredients of Ayurin are useful to inhibit growth of urinary crystals by acting on crystalloid-colloid balance, help to reverse early stage of urolithiasis and prevent reformation of recurrent urinary stones.

Useful in recurrent urinary tract infections: The antimicrobial activity against various types of urinary pathogens such as *E.coli*, *Klebsiella pneumonia* and *Pseudomonas aeruginosa* of Ayurin help prevent recurrent UTI.

Support in normal renal functioning: *Tribulus terrestris* extract decreases renal epithelial damage, restores normal glomerular morphology and supports normal functioning of kidneys.

Indications:

- For the treatment and prevention of Renal Calculi
- Obstructive and inflammatory pathology of Urinary tract
- Recurrent Urinary Tract Infections

Dosage: 2 Capsules 2 times daily.
